

## **(RDG)Policy for Environment**

### **Philosophy**

(RDG) should recognize that conservation of global environment is of primary concern for humankind as well as understand social issues deeply and collaborate continually with customers so that we achieve the long-term environmental targets, “**Hitachi Environmental Innovation 2050**”(\*1) which is set under the “**Hitachi Environmental vision**”; “Hitachi will resolve environmental issues and achieve both a higher quality of life and a sustainable society through its Social Innovation Business in collaborative creation with its stakeholders”. Through these actions, we drive research and development forward based on customers view point who share our future vision.

(\*1) Realization of “**Low-carbon Society**”. “**Resource Efficient Society**” and “**Harmonized Society with Nature**” targeted towards 2050.

### **Basic Policy**

#### ***“ Environment Conscious R&D for the Future ”***

We assume this a slogan and carry on action based on the following policies.

1. We contribute to achieve “Low-carbon Society” through not only creation of innovative technology and solution leading to reduction of CO<sub>2</sub> emission but also high efficiency of the product service and development of low-carbon energy.
2. We contribute to create service business by providing of solution which increase recycling resources, and aim for “Resource Efficient Society” through efficient usage of resources and recycling thoroughly.
3. We make efforts for conservation of natural environment around our laboratories and symbiosis with nature, and reduce environmental load which forms in the process of research and development to prevent outbreak of environmental pollution.
4. We recognize deeply that we are members of society. We talk with local communities and cooperate faithfully, and make effort to promote trusting relationships between communities through carrying out activities which contribute to conservation of natural environment.
5. We observe domestic and foreign environmental laws and social standards, and make effort to uphold international agreements and local requirements.
